Excelerate Systems and Junar announce partnership

Market-leading cloud-based Open Data platform complements Big Data practice

Redmond, WA and Palo Alto, CA, USA – June 10, 2013 – Excelerate Systems and Junar today announced a new partnership to focus on the growing Open Data market in Latin America and Europe.

Excelerate Systems, the leading provider of Security, IT Operations, Big Data, Mobile and Virtualization solutions, has continued to expand in the last two years and is ready for the next step. Leveraging the Big Data practice announced in 2012, Excelerate Systems is now offering solutions focused on Open Data from Junar, the market leader in cloud-based Open Data platforms.

"Open Data is an area of high focus for national, state and local governments in many countries. With the Junar offering customers can be up and running in a matter of days and their citizens and other stakeholders can start accessing the data immediately," commented David Bennett, CEO of Excelerate Systems. "We see the partnership with Junar as another major step in building our Big Data practice which has been very successful since we launched in 2012."

"Critical to success of any Open Data project is the ability to quickly and easily deploy – Junar has that strength, many customers are building their Open Data projects and looking for a solid experienced partner who can work with them as this market explodes with new capabilities, new products and new ideas," stated Bennett.

"Excelerate Systems' established presence in key Latin American and European markets will enable Junar to provide our unique solution to more customers and to continue our rapid expansion," commented Diego May, CEO and Co-founder of Junar. "We are delighted to enhance Excelerate Systems' suite of Big Data and Cloud Services offerings and look forward to a long and mutually productive relationship."
